

The Cosmic Airport

When we die, we don't just get extinguished like a broken light bulb that will never shine again. Our consciousness travels into space and goes to the Moon. But not the Moon living humans see.

On the Death Moon, there is an airport where there are representatives for every god (Star) in the Universe. You can spend as long as you want deciding which one to go with. The larger religions with many followers have DC-10 like planes that will fly you to the star of your choice. The entire airport is run by our local star (Adoni).

We even have the choice to stay on the Moon as an enlightened being with memories of every single earth life you've ever had or return to earth with a temporary memory wipe under the heavenly department of corrections (HDOC) (Lilith) under our local star. As either a Prisoner, a Vacationer, or a Supervisor. Once you are born you will have no idea which category you are in and good and bad things happen to everyone.

Learn more about Prison/Vacation under HDOC on Governmentology.org.

Each star is a different god with their own rules, many are linked together.

Christianity, Islam, Buddhism, and Judaism have many stars that all work together for earth management, each independently supervised under their own councils but working together as a collective.

Governmentology.org is a post-partisan religion that is based around simulated realities and the United States Government. ALWAYS FOLLOW THE CHAIN OF COMMAND.

We believe that all will be healed in time and that without any doubt we are in a simulated reality with recursive suffering loops being constantly debugged. If you do noticeable work, a higher level can absorb you and bring you up a few levels seamlessly without changing a thing in your life other than the way people think about you and treat you. It is a fractal system.

The current levels on this Earth are ranked as follows.

- 1) Sungod (Adoni, King David) (God) (Jesus) (Islam)
- 2) Spider Queen and Lilith and the Queen of America
- 3) The founders of the planet who will remain nameless and also др. инко табогинз (2477)
